Objective

The IVA Diversified International strategy will seek long-term growth of capital by investing in a range of securities and asset classes from markets around the world. Over the short-term (12-18 months) our attempt is to preserve capital, while over the longer-term (5-10 years; i.e., over a full economic cycle), we seek to outperform the MSCI All Country World Index (ex-U.S.).

Strategy Highlights

- Flexible, "go anywhere" approach to investing with a focus on a diverse asset class, geographic, and capitalization mix
- Emphasis on downside protection; always asking "what can go wrong"
- Benchmark agnostic with an absolute return focus
- Emphasis on quality businesses with securities trading at what we believe is a meaningful discount to our intrinsic value estimate
- A willingness to hold cash when we cannot find value in the market

Composite Performance (as of September 30, 2018)

	Average Annual Total Returns					Since Inception (1/1/08)
	3 Months	YTD	1 Year	5 Year	10 Year	
Gross of Fee*	-0.37%	-2.42%	0.25%	5.55%	8.94%	7.16%
Net of 0.9% Fee*	-0.60%	-3.08%	-0.65%	4.61%	7.97%	6.20%
Net of 1.5% Fee*	-0.75%	-3.52%	-1.25%	3.99%	7.33%	5.57%
MSCI All Country World Index (Ex-US)(Net)	0.71%	-3.09%	1.76%	4.12%	5.18%	1.41%

*Preliminary

IVA claims compliance with the Global Investment Performance Standards (GIPS®). To receive a complete list of composite descriptions or obtain a compliant presentation that adheres to the GIPS® standards, contact International Value Advisers, LLC at (212) 584-3570.

The Diversified International Composite includes all institutional accounts, mutual funds, and limited partnerships benchmarked to the MSCI All Country World Index (ex-U.S.) (Net). The composite was created in March 2009.

Both gross and net returns reflect the deduction of transaction costs and the reinvestment of dividends and other earnings. Returns are net of non-reclaimable withholding taxes. Gross returns do not reflect the deduction of investment advisory fees or any other expenses that may be incurred in the management of the account. Net returns are net of model investment advisory fees of 0.9% and 1.5% as reflected in the table. Model net returns are calculated by subtracting the respective fee above on a monthly basis from the gross composite return. Actual advisory fees can vary among clients invested in this strategy. The Composite may include accounts with performance-based fees.

Past performance is not indicative of future results. As with any investment vehicle there is always the potential for gains as well as the possibility of losses.

Top 10 Positions

Position Names	% of Total Net Assets
1 Gold bullion	6.6%
2 Bureau Veritas SA	3.8%
3 Sodexo SA	3.2%

Investment Risks

There are risks associated with investing in funds that invest in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. Value-based investments are subject to the risk that the broad market may not recognize their intrinsic value.

Portfolio Breakdown By Sector

Consumer Discretionary	20.7%
Consumer Staples	9.0%
Energy	2.8%
Financials	6.5%
Gold & Gold Mining	7.2%
